

A Local Energy and Climate Agency (ALEC) is an independent, autonomous, non-profit organization created through the initiative of public authorities in order to provide information, advice and technical assistance to all energy users.

An ALEC contributes to the development of local and sustainable energy markets.

It supports all energy users (inhabitants, professionals and local authorities) in decision-making. It also serves as a platform for exchanges between professionals of the building and energy industries.

[www.Federation-Flame.org](http://www.Federation-Flame.org)

The Local Energy and Climate Agency of Nancy Grand Territories was founded by the Greater Nancy and the Permanent Center of Environmental Initiatives of Nancy-Champenoux, in partnership with administrations, associations, and professional federations, energy companies and social-housing landlords.

It was created in 2007 to implement actions promoting energy efficiency, renewable energy sources and green buildings for all local stakeholders. It works mainly with residents, local authorities and social housing companies.

As of March 2020, we are a team of 8 of which 7 are energy professionals whose academic backgrounds include bachelor and/or engineering degrees.

## EUROPEAN PROJECTS

Our agency would like to apply for European projects as a subcontractor or as a participant. We are very interested in your partnership projects and in particular, Horizon 2020 « Green Deal », Interreg Europe, LIFE Climate, ERASMUS plus and others.

Currently we are looking to be a partner in the LC-GD-4-1-2020 call for proposal: Building and renovating in an energy and resource-efficient way.

## AIMS TO INFORM AND RAISE PUBLIC AWARENESS ON ENERGY EFFICIENCY IN HOUSING

We are an Energy Information Center in agreement with the national energy agency, ADEME, offering advice to individuals regarding:

- ▶ energy management and renewables,
- ▶ energetic renovation of existing housing,
- ▶ equipment and materials available on the market,
- ▶ existing financial support,
- ▶ the search for suitable organizations, engineering offices, architects or construction firms to carry out renovation.

WE ALSO PROVIDE AN INFORMATION AND DOCUMENTATION CENTER

In 2019 we advised approximately 4,000 people from 70 townships around Nancy and organized close to 100 events focusing on energy saving.

# Building Professionals

## TAILOR-MADE SUPPORT TO HELP PROFESSIONALS CARRY OUT RENOVATION PROJECTS

ALEC Nancy coordinates a network of local professionals and supports them in a personalized way according to their needs. For instance, we offer to :

- ▶ write quotes in accordance with existing regulations and financial support schemes,
- ▶ help them finding suitable technical training (air tightness, ventilation, efficient heating, etc.),
- ▶ inform them about financial support schemes available to their customers,
- ▶ support them in the development of energy performant solutions.

## A TEAM OF TWO CONSULTANTS

**Mr. THIRIET**  
**Bachelor degree**

Over 10 years experience

**Recruitment in process**

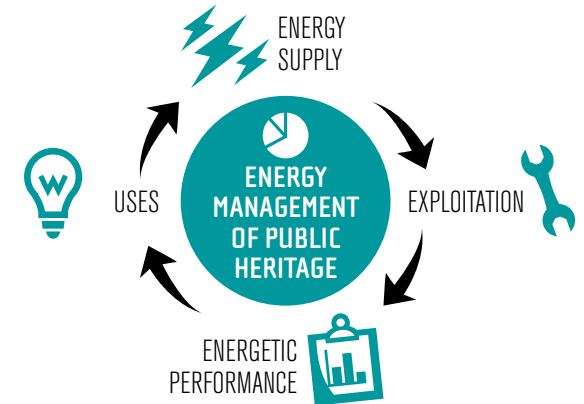

# Municipalities

## A MISSION TO HELP LOCAL AUTHORITIES MANAGE AND REDUCE THEIR ENERGY CONSUMPTION

ALEC Nancy offers the approach of Shared Energy Consulting to the local authorities and leads them towards Energy Excellence :

- ▶ first inventory and regular monitoring of consumption,
- ▶ development of an energy saving strategy,
- ▶ exchanges and pooling of good practices,
- ▶ assistance with implementing projects.
